

Specification parameters

Product Numbe	LC-303 A3 UV DTF Printer
Epson original nozzle	F1080-A1
Number of nozzles	3pcs
Print width	300mm
Print head spray	Equipped with anti blocking flash spray and automatic moisturizing function
Ink type	UV DTF ink
Ink color	C M Y K W V (Six colors)
Cartridge capacity	Each color 250ml
Curing syst em	Air cooled+LED UV lamp
Laminating machine rubber roller	High temperature,support gold stamping rubber roller
Laminating machine moving rod	Control the balance of lamination paper feeding
Thickness of material	1-3mm
Type of media	UV DTF AB Film
Loadable coil weight	40kg(Below)
Receive and release device	One paper receiving device, two paper releasing device
Operation system	Win 7, Win 11, Windows10
Operation language	Chinese / English
Environment	Temperature range:18-30°C, Humidity range:40%-60%RH
Print interface	Network port
RIP software	Maintop
Power	Standby:32W,Max:1000W
Machine size	1250mm x 660mm x 650mm (LxWxH)
Machine dimension	110Kg
Packing size	1240mm x 1050mm x690mm (LxWxH)
Packingweight	125Kg

dedicated machine

Original Epson nozzles 3pieces

Epson original nozzle printing speed

● Epson F1080-A1 Speed 4 colors CMYK+W+V 2 pieces

MICRO PIEZO PRINTHEAD
powered by **EPSON**

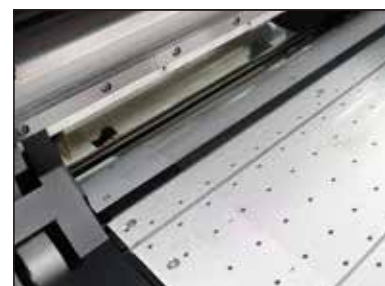

Intelligent printing and high-quality mechanical design

1. Guide

Adopting silent guide rail, make the printing process more stable and less noise

2. Widened platform

It can better adsorb materials, make printing more stable

3. Sprinkler anti-collision device

The anti collision device on both sides of the nozzle can effectively protect the nozzle, extend its usage time

4. High quality rubber roller

65mm diameter rubber roller with good flexibility ensures image quality without deformation

5. Laminating processor

Printing while laminating, improve drawing speed and save cost greatly

6. High quality motor

Powerful and more stable printing.

7. Ink supply system

White ink automatic mixer+ink shortage alarm, white ink automatic mixer to prevent white ink blockage and make printing smoother; Ink shortage alarm, reminding users to add ink timely when the ink shortage, making the printing process more hassle free

Introduction to Market Applications

Crystal labels can be printed directly, no need for plate making, it can be printed with pictures, achieving personalized small batch production, print and use immediately;

Mainly used in: graphic advertising, packaging and printing, signage and identification, and personalized customized products; Can be used on irregular product surface, such as helmets, wine bottles, handicrafts, gift box packaging, etc. Replaced the shortage of traditional silk screen printing, pad printing, water transfer printing, heat transfer printing, and UV printing, no need to transport materials back and forth to the factory, on-site pasting can reduce transportation and labor time cost. Compared with artificial, environmental protection and personalization, crystal labels have obvious advantages.

Win7 32-bit/64-bit operating system

Win7 Systems below 32 bits need to pre-install .net4.0

CPU: Core i3 and above

Memory: 4G and above Hard drive: at least 120G fast (7200 rpm)

Hard drive Monitor: 17-inch flat screen monitor, Locor display card, It can support resolution of 1024X768 and above;
